

THE RISING COMPLEXITY OF DATA

The volume of data that organisations deal with daily continues to rise. While there are plenty of benefits to be gained from leveraging this information, it also raises questions around what data organisations should store, where they should store it, the cost of storage and how to find it when it is needed.

Cloud computing has helped to positively change the business landscape but has also created new issues for businesses. For example, the volume and type of data that organisations need to archive has risen, along with the addition of new mediums where information is shared. This includes:

Personal information
contained in documents

Sensitive data
in emails

Instant message
transcripts

Social media
communications

THE IMPORTANCE OF ARCHIVING

An organisation's information archiving strategy is more important than ever.

Archiving is in place:

- ✓ To prevent data loss
- ✓ For legal necessity
- ✓ To increase security

CLOUD ARCHIVING WITHOUT COMPROMISE

EV247 is an unique cloud archiving solution that is designed specifically for growing businesses looking to minimise costs. EV247 combines Enterprise Vault (Veritas), Microsoft Azure and bluesource's managed services to provide unlimited storage and affordable data migration that puts organisations in control of their important information.

FIND THE SOLUTION

The right cloud archiving solution can help solve common data archiving issues that organisations face.

GET IN TOUCH

We help organisations protect, govern, move & manage their data.
