

With all the different public cloud services available today, it is little wonder that many organisations struggle with where to start when considering moving to the cloud. Organisations need to be certain that their data is secure and compliant when making the move to cloud based services.

*This is where our cloud service offerings comes in.*

## Our cloud service offerings:

Cloud Strategy  
Envisioning

Current State  
Assessment

Azure  
Launch

## CLOUD STRATEGY ENVISIONING

### CHALLENGES

- √ Many organisations have an appetite for public cloud services but do not know how to get started
- √ Many organisations are overwhelmed with the myriad of services available with public cloud
- √ There is often confusion around the demarcation of responsibilities with public cloud services
- √ Organisations require that their data remains secure and compliant when considering cloud services.

### THE BLUESOURCE APPROACH

The bluesource approach is to run a series of workshops to discuss and demonstrate the art of the possible with Microsoft Azure public cloud services. One of our highly skilled consultants will conduct the sessions to understand the business approach and appetite for cloud services identifying where Microsoft public cloud services can help to drive the business forward. The output of the workshops is a cloud strategy envisioning report and roadmap for recommended quick wins. Our approach is to envision the dream and define a roadmap of 'quick win' goals to move the organisation forward over time.

### BENEFITS

- √ Understand the Microsoft public cloud approach and capabilities
- √ Identify quick wins for the organisation and where public cloud services (SaaS, IaaS or PaaS) fit and can be realised following our 'envision big, deliver with focus' approach
- √ Understand how to secure and govern workloads running in Azure using best and proven practice techniques

### GET IN TOUCH

We help organisations protect, govern, move & manage their data.
