

With security threats at an all-time high, are your operating systems patched with the latest Windows security updates?

bluesource leverages an enterprise tool, ConnectWise Automate, to patch your server environments. Whether they are on-premises or in the cloud, we can carefully plan automated schedules based on your patch cycle and provide you with clear reporting information on a monthly basis.

LAPTOP AND DESKTOP PATCHING

Your IT security is only as strong as its weakest link. If your end user's laptops, desktops and third party applications are not patched to a high enough level, it could lead to a security breach. bluesource provides managed monthly automated patch solution to take away this burden.

COMMERCIALS

We offer a simple per-device per-month cost model which can be flexed up and down throughout the duration of the contract with clearly defined deliverables.

REPORTING

For both our server or end point patching services, we offer clear and concise reporting to keep your patch cycle fully updated.

View the ConnectWise Automate demo here:

<https://www.connectwise.com/resources/demo/connectwise-automate>

The following applications are currently patched by the Third-Party Update Policy:

- √ Adobe Flash®, Adobe Reader® XI and DC, Adobe Shockwave®, Adobe AIR®
- √ Apple® iTunes®
- √ Google® Chrome™
- √ Microsoft® Skype™ Business
- √ Mozilla® Firefox®, Mozilla Thunderbird®
- √ Notepad++
- √ Amazon Corretto

BENEFITS

Discovery

Learn to confidently delegate non-urgent tasks like asset discovery and inventory

Management

Manage your entire environment from a single control centre

Patching

Schedule and monitor patching automatically, and manage multiple machines at once

Monitoring

Monitor your environment proactively and deliver more value than ever before

Automation

Automate any process or task through scripting, so your team can focus on delivering value

GET IN TOUCH

We help organisations protect, govern, move & manage their data.
